The evening is planned as an interactive session, where panellists talk about the Sydney AES Conference in terms: of their impressions of the event; what stood out for them; and any ideas gleaned from conference presenters on where evaluation, as a discipline, is heading.

An invitation is extended to all Victorian AES members, as well as to others who come along to our seminars. For those who attended the conference, it will be an opportunity for you to add further comments to those of the panel concerning your experiences and reflections of the conference. For those who did not attend it will provide an opportunity for you to hear about the conference and its impact. There will also be an opportunity to provide suggestions for the 2012 AES Victorian Program.
