

Building evaluation capital in the environmental field –  
what do we have? –  
what do we need?

Mitch Jeffery

Director, Monitoring and Reporting Team,  
National Landcare Program, Department  
of the Environment and Energy

National  
Landcare  
Program

The evaluation theory:

Over the 5 year program timeframe, there are four main components:

- ✓ Annual progress reports;
- ✓ Application and approval evaluation;
- ✓ Comprehensive mid-term evaluation; and
- ✓ End of program performance evaluation.

Based on:

- ✓ SMART program outcomes; and
- ✓ Strong monitoring regime.

But.....

*Reality broke the theory.....*

## Key gaps:

- ✘ Long term monitoring framework not set up at beginning;
- ✘ Forever changing of program outcomes;
- ✘ Unsure how to measure social and environmental outcomes; and
- ✘ Lack of ongoing evaluation plan.
