Doing Evaluation

Task analysis as a pathway to
progress evaluation education

Amy Gullickson, University of Melbourne
AES Conference 21 Sept 2018

Full reference: Gullickson, A. M. (2018, September). Doing Evaluation: *Task analysis as a pathway to progress evaluation education*. Short paper presentation at Australasian Evaluation Society Conference, Launceston, TAS, Australia.

Agenda

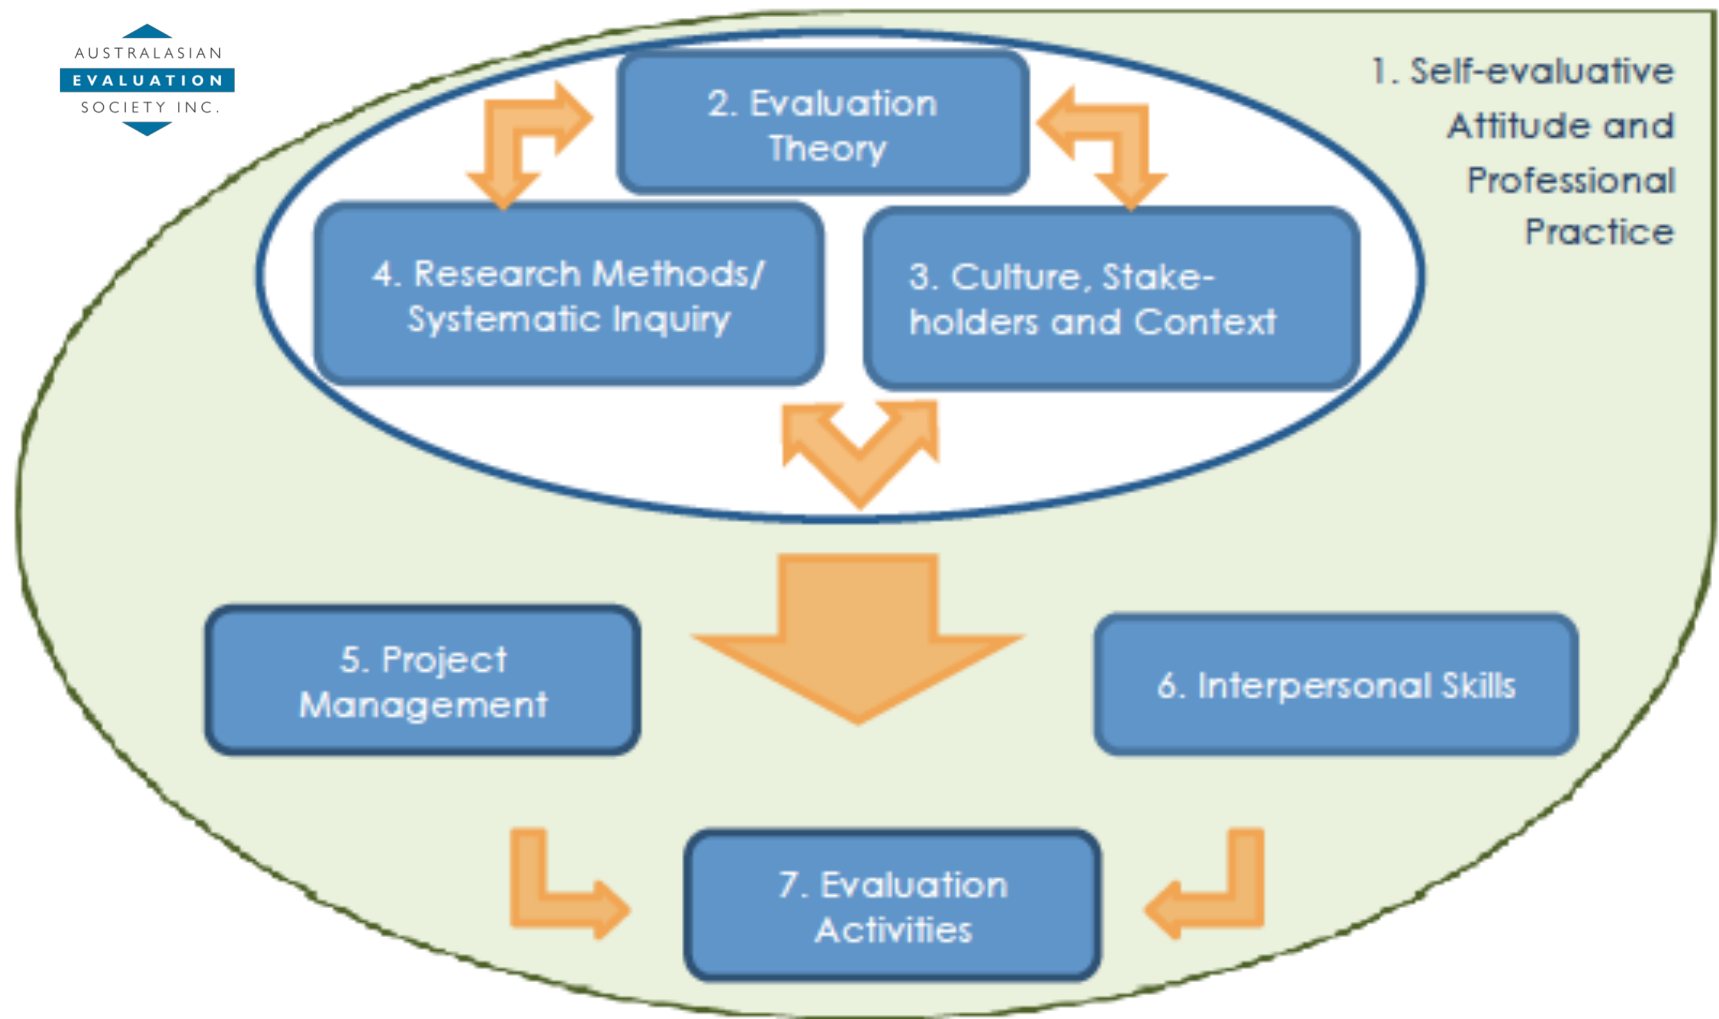

AES Competencies

Competencies vs Tasks

Task analysis on the logic of evaluation

Discussion

Evaluators' Professional Learning Competency Framework

http://www.aes.asn.au/images/stories/files/Professional%20Learning/AES_Evaluators_Competency_Framework.pdf

Competencies

(King, et al., 2001, p.231; Brannick, et al., 2007, p.136)

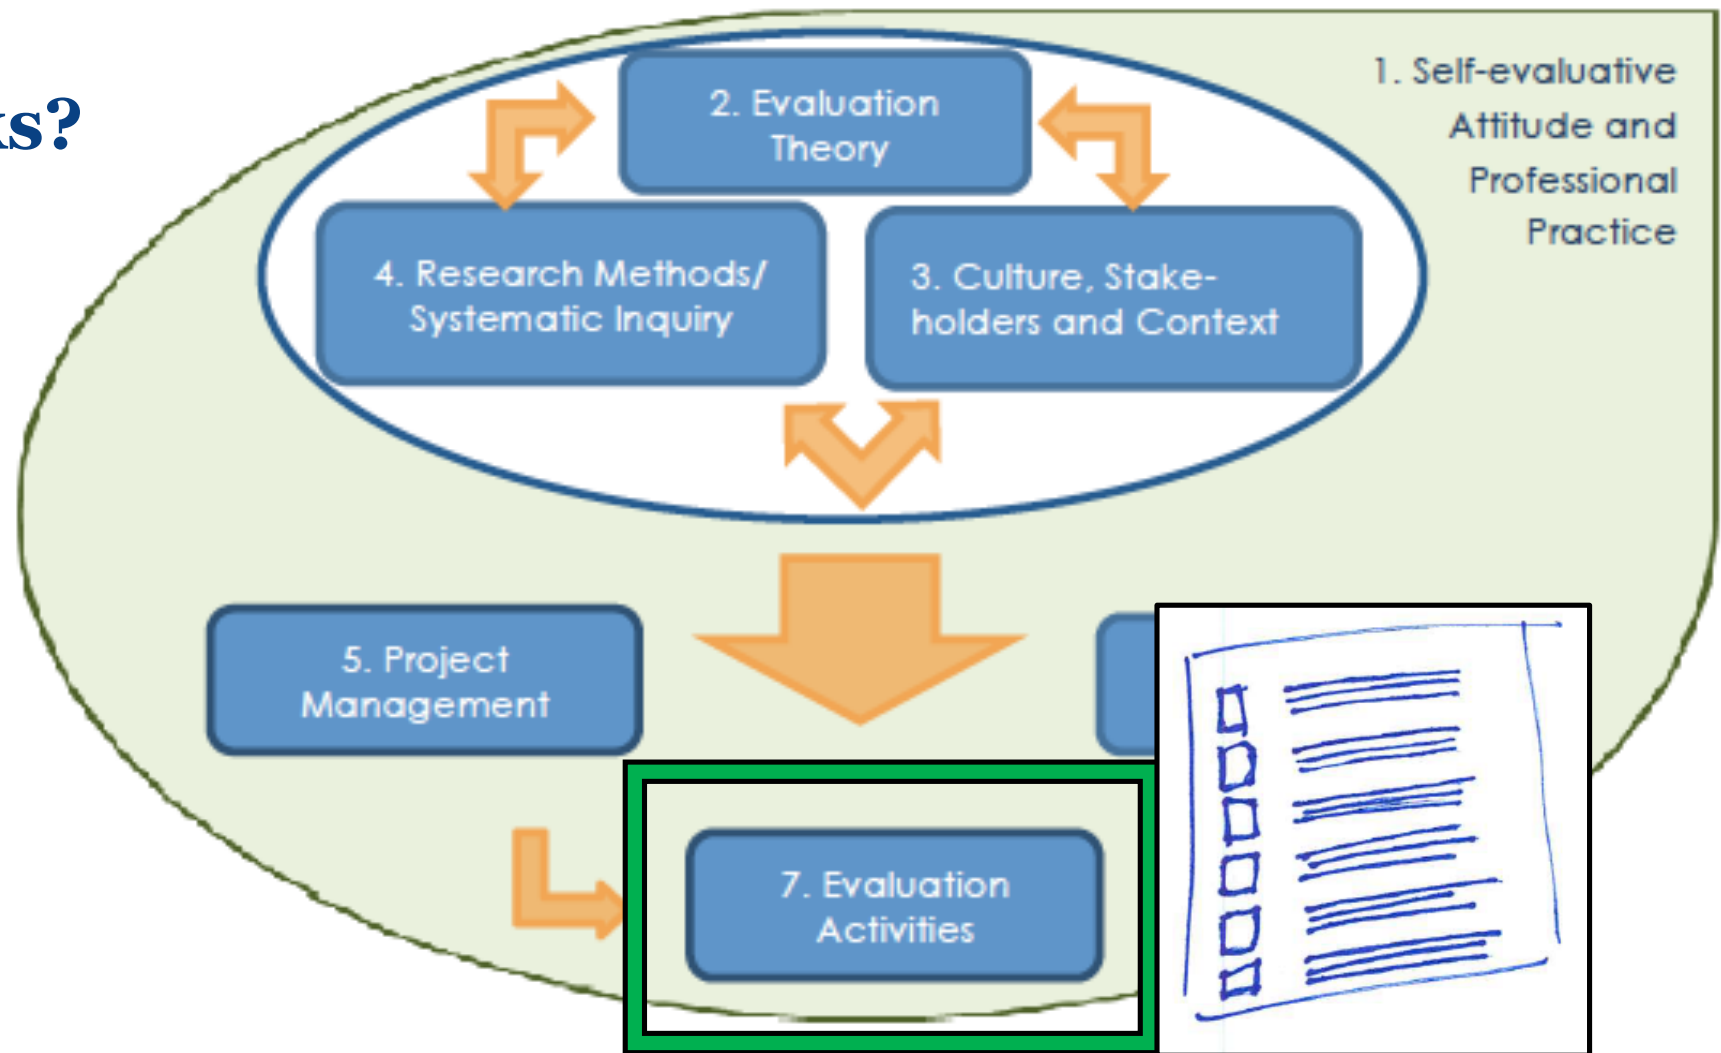

Competencies

(King, et al., 2001, p.231; Brannick, et al., 2007, p.136)

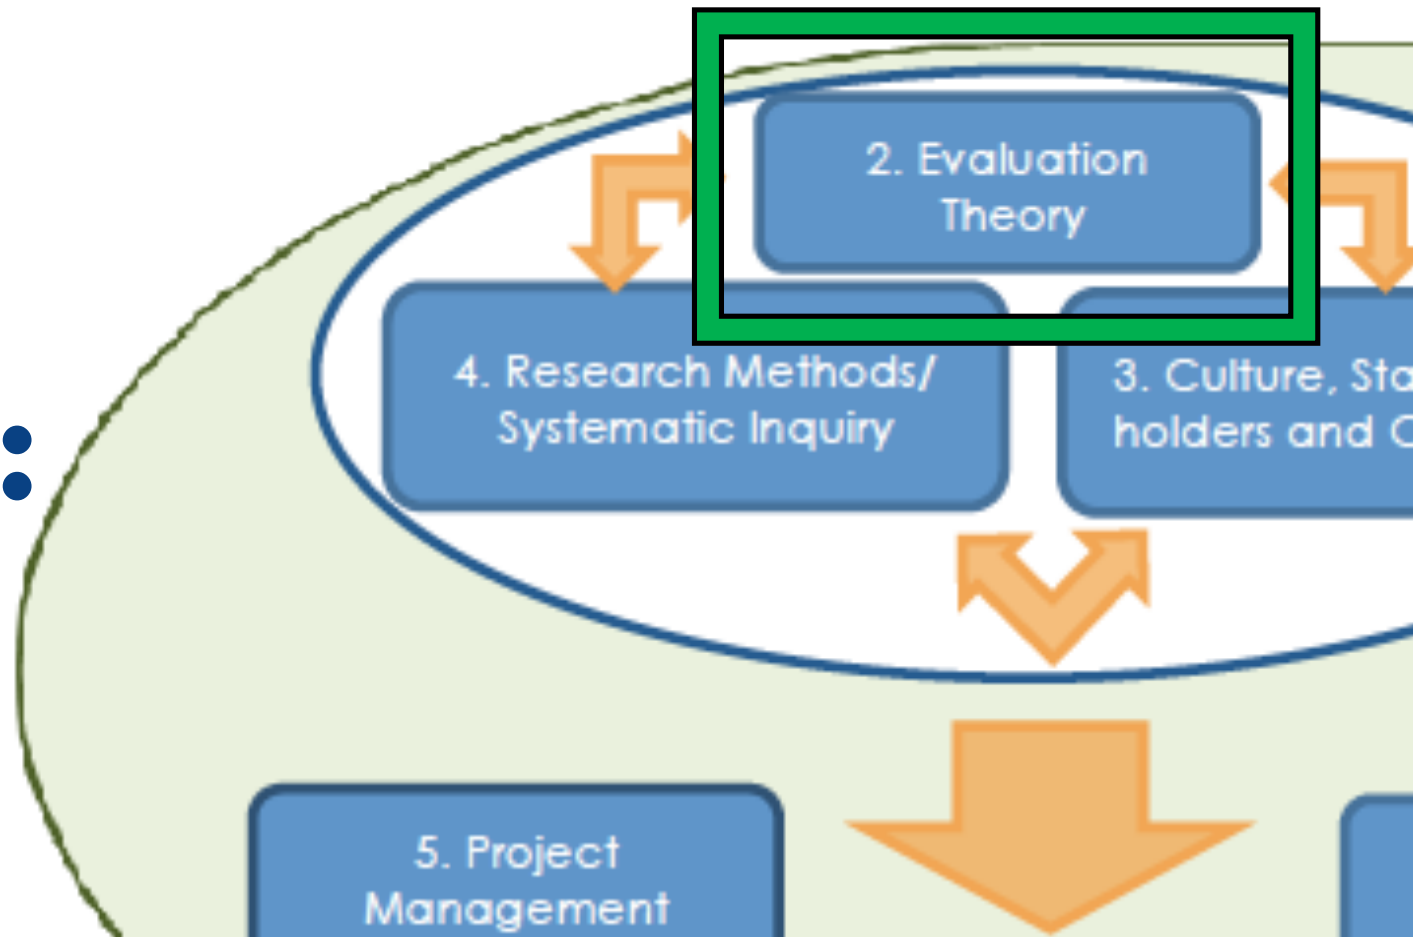

Tasks?

(AES PLC, 2013)

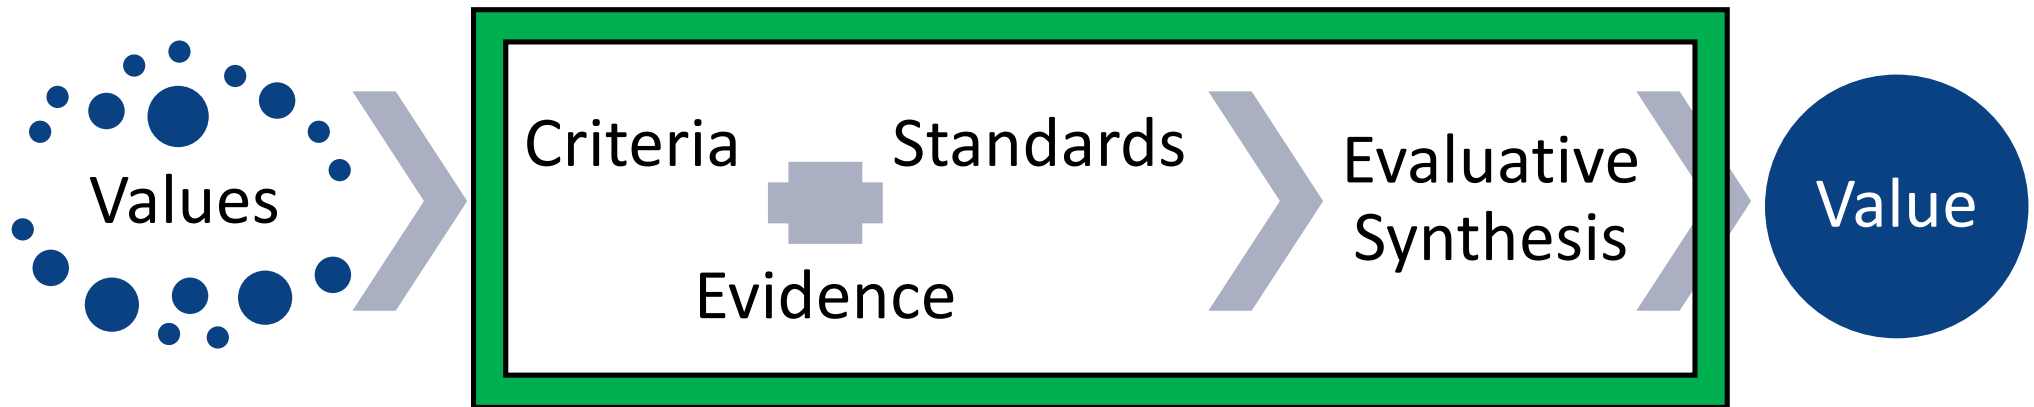

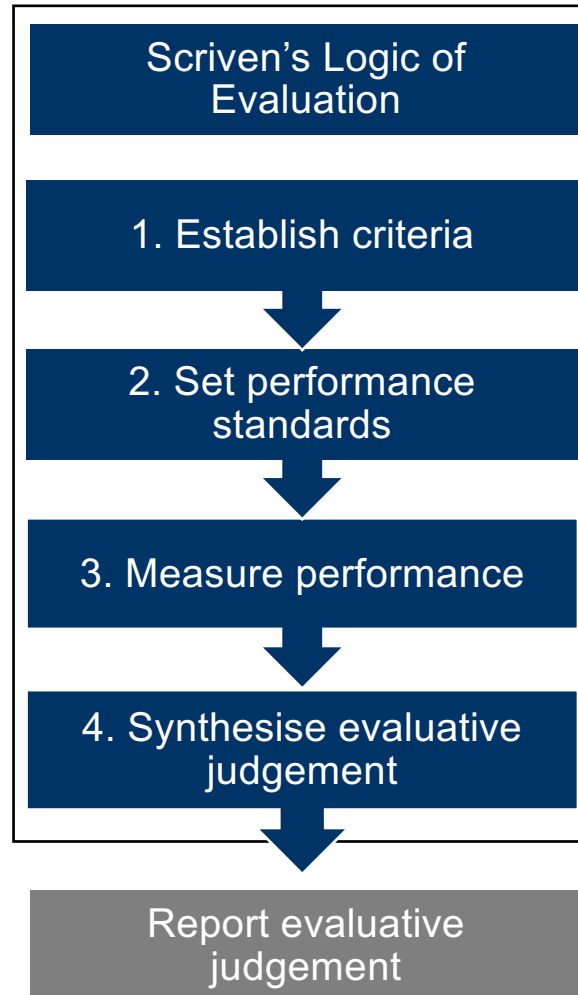

Task Analysis: Part 1

Logic of evaluation

(adapted from Scriven, 1991; Fournier, 1995)

**Taylor (1961), Hare (1967),
Rescher (1969)**

- | |
|--|
| 1. Identify the object (X) and the value to be applied to the object |
| 2. Identify the “class of comparison” to which X belongs (Z) |
| 3. Identify norms for Z |
| 4. Develop a set of operational statements describing levels of performance for each of the norms of Z |
| 5. Determine the characteristic(s) of X (the “good making characteristics”) |
| 6. Compare X’s characteristics with the operational statements above to come to an evaluative conclusion |

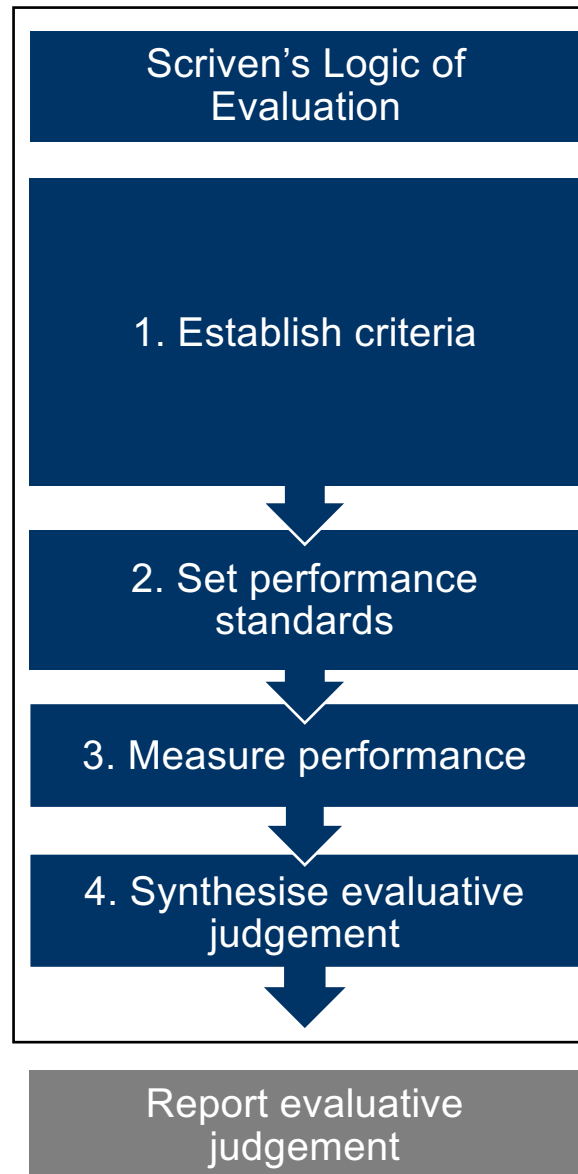

7. Justify the norms used

(Summary and comparison is a visually adapted version of Nunns, 2016, Table 4, p. 61)

**Taylor (1961), Hare (1967),
Rescher (1969)**

1. Identify the object (X) and the value to be applied to the object
2. Identify the “class of comparison” to which X belongs (Z)
3. Identify norms for Z
4. Develop a set of operational statements describing levels of performance for each of the norms of Z
5. Determine the characteristic(s) of X (the “good making characteristics”)
6. Compare X’s characteristics with the operational statements above to come to an evaluative conclusion

7. Justify the norms used

(Summary and comparison is a
visually adapted version of
Nunns, 2016, Table 4, p. 61)

**Taylor (1961), Hare (1967),
Rescher (1969)**

1. Identify the object (X) and the value to be applied to the object
2. Identify the “class of comparison” to which X belongs (Z)
3. Identify norms for Z
4. Develop a set of operational statements describing levels of performance for each of the norms of Z
5. Determine the characteristic(s) of X (the “good making characteristics”)
6. Compare X’s characteristics with the operational statements above to come to an evaluative conclusion

7. Justify the norms used

Scriven’s Logic of Evaluation

1. Establish criteria

2. Set performance standards

3. Measure performance

4. Synthesise evaluative judgement

Report evaluative judgement

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z, **weight as needed.**
Justify the criteria and weighting

Operationalize the criteria by **identifying indicators.** Describe levels of performance on each (standards). **Justify the indicators and standards**

Observe X’s performance on each indicator

Compare X’s performance to established standards to arrive at a judgement

Report judgement to stakeholders

Expanded Logic of Evaluation

Define the evaluand (X) and the group/**context** (Z) to which it belongs

Identify criteria (norms) for Z, **weight as needed. Justify the criteria and weighting**

Operationalize the criteria by **identifying indicators**. Describe levels of performance on each (standards). **Justify the indicators and standards.**

Observe X's performance on each indicator

Compare X's performance to established standards to arrive at a judgement

Report judgement to stakeholders

Task Analysis: Part 2

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z, weight as needed.
Justify the criteria and weighting

Operationalize the criteria by identifying indicators. Describe levels of performance on each (standards). Justify the indicators and standards.

Observe X's performance on each indicator

Compare X's performance to established standards to arrive at a judgement

Report judgement to stakeholders

Write the task sentences

(Subject)

verb

object

infinitive
phrase

(Workers)

what
they do

to what or
whom

how and or
why the
action is
done

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z,
weight as needed.
Justify the criteria and weighting

Operationalize the criteria by
identifying indicators. Describe
levels of performance on each
(standards). Justify the indicators
and standards.

Observe X's performance on each
indicator

Compare X's performance to
established standards to arrive at a
judgement

Report judgement to stakeholders

(Evaluators)

verb

Define

object

the evaluand

infinitive phrase

to understand it
(i.e., its content,
boundaries, goals,
activities) and to
delineate the scope
of the evaluation

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z,
weight as needed.
Justify the criteria and weighting

Operationalize the criteria by
identifying indicators. Describe
levels of performance on each
(standards). Justify the indicators
and standards.

Observe X's performance on each
indicator

Compare X's performance to
established standards to arrive at a
judgement

Report judgement to stakeholders

(Evaluators)

verb

Define

object

the group/
context of the
evaluand

infinitive phrase

to understand its
likely
characteristics, and
the theory on which
it operates.

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z,
weight as needed.
Justify the criteria and weighting

Operationalize the criteria by
identifying indicators. Describe
levels of performance on each
(standards). Justify the indicators
and standards.

Observe X's performance on each
indicator

Compare X's performance to
established standards to arrive at a
judgement

Report judgement to stakeholders

(Evaluators)

verb

Identify

object

criteria for the
evaluand or
its group
(whichever
makes sense)

infinitive phrase

to understand what
is necessary for it
to be good.

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z,
weight as needed.
Justify the criteria and weighting

Operationalize the criteria by
identifying indicators. Describe
levels of performance on each
(standards). Justify the indicators
and standards.

Observe X's performance on each
indicator

Compare X's performance to
established standards to arrive at a
judgement

Report judgement to stakeholders

(Evaluators)

verb

weight

object

criteria as
needed (using
appropriate
methods)

infinitive phrase

to prioritise
understand the
most important
aspects of
goodness.

Expanded Logic of Evaluation

Define the evaluand (X) and the group/context (Z) to which it belongs

Identify criteria (norms) for Z,
weight as needed.
Justify the criteria and weighting

Operationalize the criteria by
identifying indicators. Describe
levels of performance on each
(standards). Justify the indicators
and standards.

Observe X's performance on each
indicator

Compare X's performance to
established standards to arrive at a
judgement

Report judgement to stakeholders

Next steps

For teaching!

- Subtasks – list them out
- Align knowledge, skills, abilities and other characteristics to the tasks.
- Figure out best teaching and assessment strategies

For doing!

- What questions align with the steps?
- Put them into a checklist to guide your evaluation practice (email me if you want mine)

Next steps: Rating the Tasks

Difficulty

- Difficulty in doing a task correctly relative to all other tasks within a single job

Criticality

- Consequences of error – the degree to which an incorrect performance would result in negative consequences

Importance

- Difficulty + Criticality

Result

- Prioritisation of difficult and critical tasks
- Association of KSAOs with tasks
- A clear pathway of learning that leads to an assessed capability to perform specific tasks in evaluation

Q&A, Discussion

THE UNIVERSITY OF
MELBOURNE

Thank you. Stay in touch!
