CONSULTING

A word cloud featuring various social and health-related terms. The words are arranged in a non-uniform, overlapping manner. The colors used are teal, purple, red, and blue. The words are oriented both horizontally and vertically.

discrimination
racism
poverty
suicide
sexism
deprivation
illness
wellbeing
violence
immunisation
screening
addiction

What would
help ...

Thinking about ...

What has ...

What qualities

What
barriers...

Frustrations
....

If you had a magic wand
just for work, and you
could use it once a week
to help one client, what
would you have used it
for this week?

How do
you feel
when

Any innovations ...

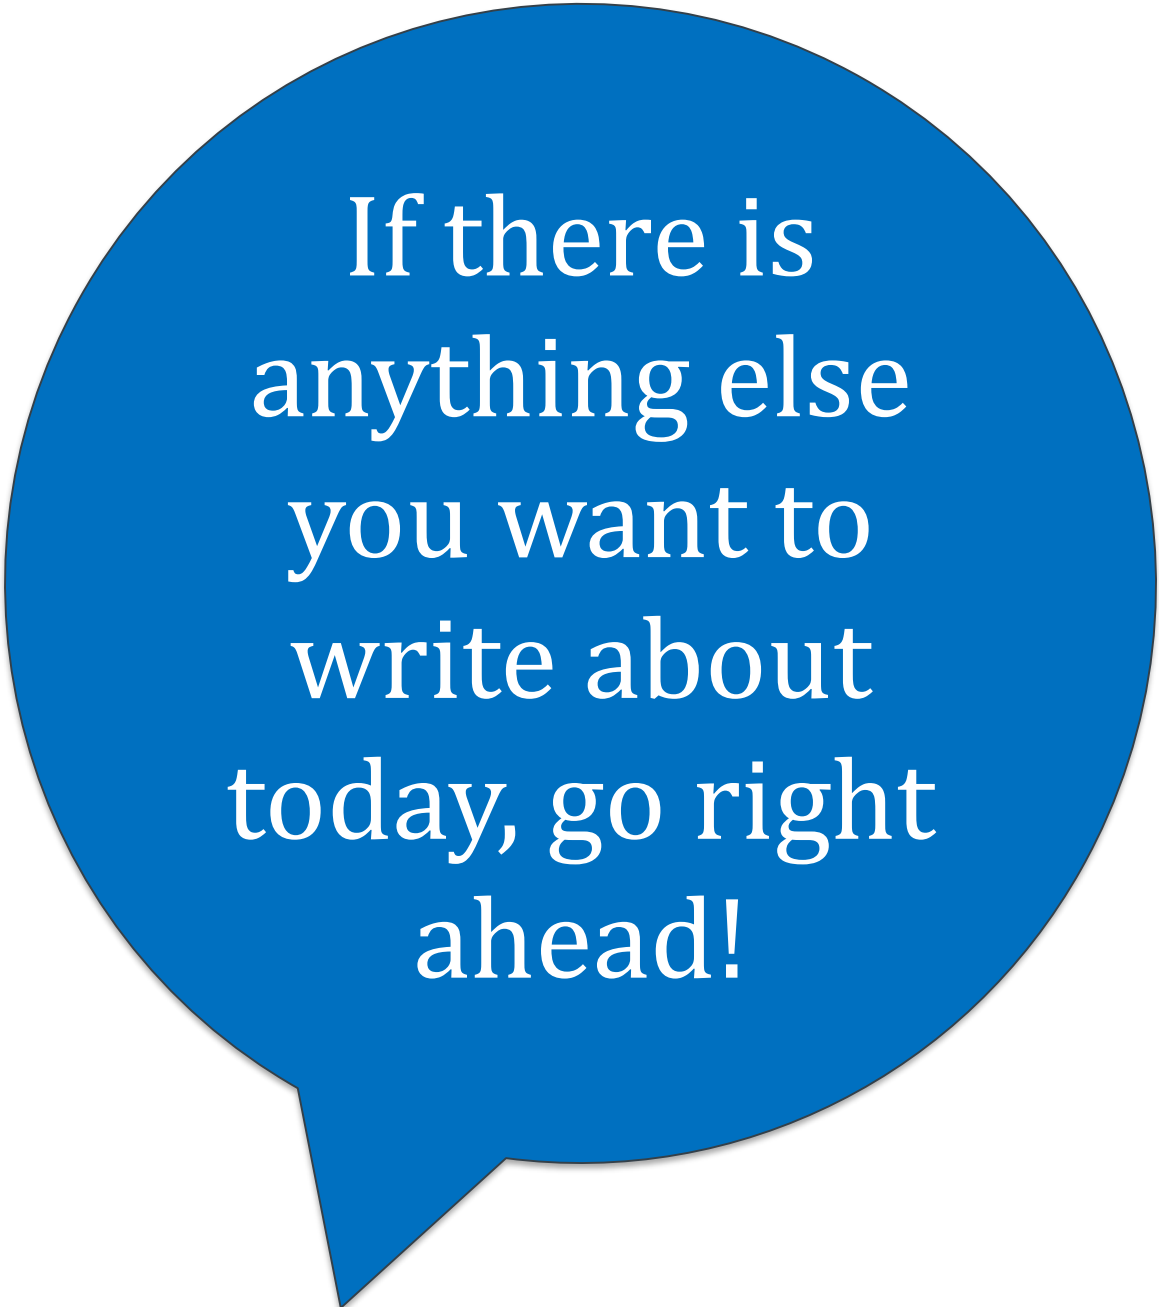

What happened
when ...

Making a difference...

Happy
moments

**Oh.
OK.
But**

If there is
anything else
you want to
write about
today, go right
ahead!

Import From SurveyMonkey Wizard - Step 1

Welcome to the Survey Import Wizard

NVivo will import your survey as a dataset, and create cases, nodes and attributes in your project.

Your respondents will be stored as [cases](#).
For each respondent, you'll be able to open their corresponding case to see all of their responses.

[Closed-ended questions](#) are created as case [attributes](#).
You'll be able to compare your respondents by demographic or other values.

[Open-ended questions](#) are created as [nodes](#).
All of the responses to a question will be grouped together under a single node.

The Wizard will let you identify the closed and open-ended questions in your survey.
